Amy --

We're looking into the question about NSR and hope to have a response today. In addition, we are finalizing the NOx RACT and antibacksliding sections of the NPR. I plan to send the NOx RACT section soon.

Did Art have a chance to look over the CADC section yet?

Also, I thought you were going to give us some language dealing with requiring 1-hour ozone attainment demos to strengthen the air quality component on page 122.

Could you clarify the verbal comment that was made about page 136 dealing with "either or." Unfortunately I did not have the FR notice in front of me at that time.

Thanks.

Hi Denise -

We don't have anything else to send over. There were a couple places where we asked questions - e.g. about NSR. Do you all have answers/responses? Please let me know.

Thanks,
Amy
